SafetyVan adds the features and construction to the safest US factory produced, extended body passenger van for an incomparably safe and secure vehicle.

The amazing "Fiberglass Reinforced Roof Section" provides added strength and insulation - built and tested to withstand the forces of rollover incidents. The added insulation provides the additional benefit of passenger comfort in both the hottest and coldest operating conditions.

Traveling in the SafetyVan is the same as traveling in comfortable bus style seating in a quiet, car-like environment. Road and engine noise are at a minimum, making any conversation or radio listening easy and pleasurable.
